Jl. A. Yani Lr. Pangi Tangga Takat, Seberang Ulu 2 Palembang

I am a graduate of a D4 degree in Information Management, with 4 years of experience as a Software Engineer in the logistics domain (PT Siberat Digital Logistik). I specialize in backend development (Node.js, TypeScript, Laravel), system integration (WhatsApp Business API, MySQL), and RAG/AI solutions (LangChain.js, ChromaDB, OpenAI). I am skilled at translating business requirements into scalable architecture, and experienced in collaborating across teams to deliver secure, high-performance web applications.

Work Experiences
